PROFILE SUMMARY

PHP DEVELOPER

- I am a PHP developer with over 3 years of experience in building diverse projects, including news websites, e-commerce platforms, AI-based applications, and video generation tools. I have strong coding skills in Core PHP and Object-Oriented Programming (OOP) concepts, and I am proficient in front-end technologies like HTML, CSS, jQuery, and JavaScript. My expertise extends to frameworks such as CodeIgniter and Laravel, as well as backend technologies like Node.js, React, MySQL, and MongoDB. I am experienced in version control with GIT and SVN and have worked extensively with REST APIs, third-party integrations, and payment gateways. Additionally, I have hands-on experience with AWS services, including EC2, S3, and Text to Speech. I excel in technical documentation and integrating social media functionalities into applications.

- **Country :** India

Work Expirience

Software Engineer
Techferry
feb 2024 – Present
Working as a Full Stack Developer, responsible for designing, developing, and maintaining web applications. In this role, I handle both frontend and backend development tasks, ensuring the seamless integration of various system components.

PHP Backend Developer (CodeIgniter)
Vega6 Webvare Technology Private Limited
July 2022 – Jan 2024
Responsible for backend development, bug fixing, and mail handling. Worked extensively on AI-based and video processing web applications, contributing to the development of innovative solutions and enhancing application performance and reliability.

Core PHP and Laravel Developer
Webwire Software Solutions, Lucknow
Oct 2021 – July 2022
Managed backend development for various e-commerce projects, utilizing Core PHP and Laravel frameworks. Focused on creating robust, scalable, and efficient backend solutions .

Projects

Thesharepage

An e-commerce website developed using PHP, HTML, CSS, JavaScript, jQuery, and AJAX. Integrated various social media APIs to enhance user engagement and functionality.

Dfreeindia

A college consultancy platform built with Laravel, HTML, CSS, JavaScript, and jQuery. Integrated third-party APIs to streamline the consultation process and improve user experience.

Aistaffs

Developed a chat-based AI application similar to ChatGPT, focusing on backend development. Utilized CodeIgniter, PHP, HTML, CSS, and JavaScript, incorporating social media integration, autoresponder integration, AWS API, and GPT-3 for advanced AI functionalities.

Wooduu

An AI-powered platform designed to generate niche-specific YouTube videos. Implemented using CodeIgniter, HTML, CSS, JavaScript, jQuery, and AJAX, with integration of social media features, autoresponders, AWS API, and GPT-3.

Contentreel

Created a video generation tool that produces short and long videos based on scripts. Developed using CodeIgniter, PHP, HTML, CSS, JavaScript, jQuery, and AJAX, with support for social media integration, AWS API, autoresponders, and FFmpeg for video processing.

Prosper India Foundation

Developed a comprehensive platform focusing on India's GDP, military, and education sectors. Worked on both frontend and backend development using PHP and MERN stack (MongoDB, React, Node.js), delivering a robust application for data visualization and analysis.

Chat Application

Built a basic chat application for learning purposes using MongoDB, React, and Node.js. This project served as a foundational experience in real-time communication technologies.
